MAXIMUM POWER MAX-GENE

LIQUID ACID BACTERICIDAL CLEANER - REMOVES STUBBORN STAINS QUICKLY AND EASILY SANTISING AS IT CLEANS

MAX-GENE is a powerful bactericide, killing most common bacteria quickly and completely. Formulated as a highly effective hard surface acid cleaner that breaks down and destroys many contaminations that are normally difficult or impossible to remove by conventional cleaners. Eliminates oxidation, hard water spots, dirt, soap scum, mildew stains, scale, mineral deposits and rust stains. Safe to use on Ceramic, glass, tiles, grout, metal, porcelain, plastic, brass, copper, chrome and fiberglass. Suitable uses include water fountains, urinals, showers, fixtures and tiled walls and floors. Completely safe for use on porcelain and enamel glazes.

IDEAL FOR THE REMOVAL OF:

- Water stains in toilet bowls and wash basins
- Water marks and uric acid build up in urinals
- Body fat and soap residues in shower stalls and baths
- · Lime scale and algae growths in any area
- Various stains including rust from ceramic surfaces

DIRECTIONS FOR USE

Ready to use directly from the bottle. Apply a generous amount of MAX-GENE to the hard surface. Agitate lightly and allow to air dry, or wipe dry with a cloth. For best results MAX-GENE should be used undiluted in toilet bowls, wash basins and urinals, allow to dwell on the area for a short time. The area should be lightly agitated before rinsing thoroughly. MAX-GENE may be diluted with up to 4 parts water for regular maintenance of these areas.

SAFE HANDELING

- Avoid all personal contact, including inhalation.
- Wear protective clothing when risk of exposure occurs.
- Use in a well-ventilated area.
- WARNING: To avoid violent reaction, ALWAYS add material to water and NEVER water to material.
- Avoid smoking, naked lights or ignition sources.
- Avoid contact with incompatible materials.
- When handling, DO NOT eat, drink or smoke.
- Keep containers securely sealed when not in use.
- Avoid physical damage to containers.
- Always wash hands with soap and water after handling.
- Work clothes should be laundered separately. Launder contaminated clothing before re-use.
- Observe manufacturer's storage and handling recommendations contained within the SDS. Read before use.

MAXIMUM POWER MAX-GENE

DIRECTIONS FOR USE

Apply MAX-GENE undiluted to surface and allow to settle for a few minutes. Agitate the surface lightly then rinse thoroughly. For regular maintenance and disinfecting, dilute 1 part MAX-GENE with up to 4 parts water (250ml:1L).

Contains: Phosphoric Acid 75-95% CAS 7664-38-2

PHOSPHORIC ACID, SOLUTION CLASS: CORROSIVE 8 UN: 1805 P: III HAZCHEM: 2R

DANGER

H302 HARMFUL IF SWALLOWED.
H313 MAY BE HARMFUL IN CONTACT
WITH SKIN.

H314 CAUSES SEVERE SKIN BURNS AND EYE DAMAGE.

H318 CAUSES SERIOUS EYE DAMAGE.
